

NOTE FOR GLC:

STATINTL

I concur with [] views to the extent the outline is good, but that any such study should be under your supervision and I don't believe we should unleash fellows on the Hill.

STATINTL

I recommend a counterproposal to [] that he has a good outline and offer to make available our annual reports over the last few years (five or so) so they can read themselves into these problems on the basis of recorded history and come up with sort of an inhouse assessment of where that has left us and that would be stage one, and we would then consult with him on what stage two should be.

LLM

STATINTL

Would you talk with [] about this along lines of your suggestion. Note the 1974 annual report is back on my desk.

Have done. They are in holding pattern, placed here by Colby after Mr. Mohr saw Colby on this - they will take it over & storage in the spirit to serve up to Colby again. [] agreed with our suggestion.
